

XINGYUN CHEN

Full-stack developer, software developer with good self-initiatives, excellent organization and researching skill, and great attention to detail. Fast learner. Problem solver. 5+ years of work experience and project experience in web development. Led and completed many projects with industry standard quality. Contract instructor in Pacific Design Academy teaching web design & development in React and WordPress.

FULL-TIME WORK EXPERIENCE

Full-stack Developer – Intermediate | Insurance Corporation of British Columbia

Victoria, BC | May 14, 2023 – Present

- Led the modernization of 5+ legacy internal applications by migrating to modern Angular architecture, redesigning user interfaces, implementing automated CI/CD pipelines, and streamlining deployment workflows, resulting in improving maintainability, testing and deployment efficiency, and developer productivity.
- Developed two public-facing applications for the MyICBC portal, owning the end-to-end implementation from responsive Angular UI development to Spring Boot backend services, enabling customers to request driver abstracts and track card status online, improving self-service accessibility and reducing reliance on in-person or phone support.
- Designed and implemented an end-to-end OAuth 2.0 authentication flow, enabling secure access through JWT-based authentication and session management.
- Mentored a co-op student through onboarding, code reviews, technical guidance, and project delivery, contributing to their successful return offer as a junior developer.
- Provided ongoing technical mentorship to co-op students and junior developers by reviewing code, approving merge requests, answering technical questions, troubleshooting issues, and promoting engineering best practices.
- Onboarded and mentored 5+ co-op students through technical guidance, code reviews, and hands-on support, improving ramp-up speed and enabling successful completion of their work terms.

Full-stack Developer | Insurance Corporation of British Columbia

Victoria, BC | Nov 7, 2022 – May 14, 2023

- Developed and maintained 2 internal Angular applications using Angular Material and SCSS, integrating with existing Spring Boot APIs to deliver key business workflows for internal users
- Led the migration of a legacy JSF web application to Angular, modernizing the frontend architecture, improving maintainability, and enabling faster feature development and UI consistency.
- Developed end-to-end automated testing suite using Cypress for internal web applications, improving regression testing reliability and reducing manual testing effort
- Led research and proof-of-concept implementation of Docker and Kubernetes-based deployment strategies on Microsoft Azure to evaluate containerized application hosting for internal systems.

Java Developer | Insurance Corporation of British Columbia

Victoria, BC | Jan 4, 2021 – Sep 2, 2022

- Developed a Java-based command-line validation framework to automate comparison of a large-scale database migration, consistently processing and

SKILLS

Web Development

- Angular
- REACT
- NextJs
- Material
- Tailwindcss
- Bootstrap
- HTML
- CSS/Sass/Scss
- WordPress
- NodeJS
- ExpressJS
- Jakarta EE
- Spring Boot
- NestJS
- AWS

Databases

- Oracle
- PostgreSQL
- DB2
- MongoDB

Languages

- Java
- JavaScript
- TypeScript
- C
- Python
- C#

Tools & DevOps

- Jenkins
- Maven
- Nodejs/NPM
- Subversion
- Github/GitLab
- Postman
- JetBrains
- Nexus repo
- WAS Liberty
- Nginx
- Globascope
- Miro/Mural
- JIRA
- Confluence
- MS Teams
- MS Azure
- Docker
- HPSM
- Splunk
- Mainframe

Testing

- Selenium
- Cucumber
- Cypress
- TestNG
- JUnit
- Jest
- Jasmine

EDUCATION

Bachelor of Software Engineering

University of Victoria

2016 – 2022

GPA: 5.64 / 9

Victoria, BC, Canada

validating 50M+ records per day and serving as the source of truth for schema consistency during migration. Implemented PowerShell automation for scheduled database file transfers, integrated with Windows Scheduler, PGP encryption/decryption, and Globalscape FTP for secure and reliable data movement.

- Developed an automated testing framework with 100+ end-to-end test cases using Selenium, Cucumber, and TestNG to improve regression coverage and ensure stability across critical application workflows.

PART-TIME WORK EXPERIENCE

VCCA Board Member & Technician | Victoria Chinese Commerce Association

Victoria, BC | Oct 17, 2024 – Dec 25, 2025 | <https://vcca.ca/wordpress/>

- Served as a Board of Directors member at VCCA, contributing to event planning, budgeting, and execution of community events.
- Developed, deployed, and maintained the VCCA WordPress website, enabling centralized communication of community events and information, improving accessibility for members and reducing reliance on manual or ad-hoc updates.

Web Development Instructor | Pacific Design Academy

Victoria, BC | Nov 27, 2023 – Nov 30, 2024

- Prepared and delivered structured web development courses on React and WordPress, tailoring course content to student skill levels and improving learning outcomes through customized curriculum design and hands-on project-based teaching.

PERSONAL PROJECTS

IOS application

Personal Project | Jan 2026 – Present | <https://github.com/chemxy/costtrackerios>

- Independently designed and developed a personal finance iOS application using SwiftUI and SwiftData, covering UI/UX design, requirements specification, system architecture, and full implementation.

Onboarding-Genie

Outsourcing Project | Checkfront | May 2021 – Aug 2021 | Private Project owned by Checkfront

- Collaboratively designed and developed a booking wizard application in React and PHP with a cross-functional team of 13 members.
- Developed 5+ React pages and a complete backend API as a team.
- Built Github Actions to automate the build pipeline.
- Implemented testing framework with Jest and Cucumber with 10+ test cases.

Personal Website

Personal Project | 2020 – 2022 | <https://github.com/chemxy/personal-website>

- Refactored to 4+ versions using different technologies, including ExpressJS, REACT, Angular + Bootstrap & Angular + Material. Deployed on Github.

Address Visualizer

Outsourcing Project | China Post | 2021 | <https://github.com/chemxy/AddressVisualizer>

- Designed and developed a web application to visualize massive addresses on a map, Leveraging AMap API to convert addresses from plain text to geographical data.
